All blocks are based on the Universal Transverse Mercator Grid System, Zone 17 with X origin = 1,640,416.67 feet. (500,000 international meters), at 81° West Longitude, and Y origin = 0 feet at 0° Latitude Each regular block contains 5,760 acres. The areas of the fractional blocks abutting the three league have not been determined.

The identification of the blocks is based on numerical sequences of N (North) starting at Y = 0 and E (East) starting at X = 0 Example. N 986–E 74

Onshore planimetric base compilation is from the National Topographic Map 1:250,000 series with the coastline revised to agree with current official nautical charts.

This revised diagram supersedes protraction diagram NG 17-4 FT. MYERS WEST NO. 1 approved October 10,1972.
CHARLOTTE HARBOR NG 17-4, revised and approved December 2, 1976

Subdivision of Blocks on the Outer Continental Shelf

Typical method of subdivision of the regular blocks, each subdivision being an aliquot part of the total, based on midpoint subdivision throughout
