

The NewsRoom

Release: #3178

Date: October 22, 2004

**Hurricane Ivan Evacuation and Production Shut-in Statistics
as of Friday, October 22, 2004**

The next report will be issued Monday, October 25, 2004, at 1:00 pm CDT.

This survey is reflective of 18 companies' reports as of 11:30 a.m. Central Time.

Districts	Lake Jackson	Lake Charles	Lafayette	Houma	New Orleans	Total
Platforms Evacuated	0	0	0	0	9	9
Rigs Evacuated	0	0	0	0	1	1
Oil, BOPD Shut-in	0	0	0	2,770	423,402	426,172**
Gas, MMCF/D Shut-In	0	0	0	12.16	1,509.42	1,521.58**

**Shut-in production rates do not include production lost due to the destroyed platforms.

These evacuations are equivalent to 1.18% of 764 manned platforms and 0.85% of 117 rigs currently operating in the GOM.

This shut-in oil production is equivalent to 25.07% of daily production of oil in GOM, which is approximately 1.7 million BOPD. The 426,172 barrels per day that is currently shut-in is approximately 2.16% of the 19.7 million barrels consumed in the U.S. each day.

This shut-in gas production is equivalent to 12.37% of the daily production of gas in the GOM, which is approximately 12.3 BCFPD. The 1,521.58 MMCF per day that is currently shut-in is approximately 2.53% of the 60.184 BCF consumed in the U.S. each day.

The cumulative shut-in oil production for the period 9/11/04-10/22/04 is 23,419,967 bbls, which is equivalent to 3.871% of the yearly production of oil in the GOM, which is approximately 605 million barrels.

The cumulative shut-in gas production 9/11/04-10/22/04 is 97.154 BCF, which is equivalent to 2.183% of the yearly production of gas in the GOM, which is approximately 4.45 TCF.

These cumulative numbers reflect updated production numbers from all previous reports. The daily reports only represent input received by 11:30 a.m. CDT. If a company does not report by 11:30 a.m., its production is not included in the daily special information release, but it is included in the cumulative shut-in production. This may result in an apparent increase in the cumulative report amount.

The Minerals Management Service is the federal agency in the U.S. Department of the Interior that manages the nation's oil, natural gas, and other mineral resources on the Outer Continental Shelf in Federal offshore waters. The agency also collects, accounts for, and disburses mineral revenues from Federal and American Indian lands. MMS disbursed more than \$8 billion in FY 2003 and more than \$135 billion since the agency was created in 1982. Nearly \$1 billion from those revenues go into the Land and Water Conservation Fund annually for the acquisition and development of state and Federal park and recreation lands.
