

Within the Office of Environment, The Environmental Operations Section is responsible for providing the availability of environmental documents per 40 CFR § 1506.6(b). These environmental assessments are publicly available via the BSEE Data Center.

Site-specific Environmental Assessments (SEA's) are available for the following:

- Exploration Plans
- Development Operations & Coordination Documents
- Geological & Geophysical Survey Application
- Structure Removals

To access the SEA's, click the following link:

<https://www.data.bsee.gov/Other/DiscMediaStore/ScanPlans.aspx>

The screen below should appear. You can filter SEA's by entering the "Type" field and can further filter by date range. Then select the "Submit Query" button.

After the query results are returned, simply select the record you would like to view under the "Download" tab.

Data Grid

Populate the Data Grid when no Query Options are chosen?
