DOI-BOEM-2021-002343	02/08/2021	02/09/2021	Alazem, Samer	Petrohab Lic	Closed	Can you please send me the latest revision of a document that you have that is called "Requirements for Pressurized Welding Enclosures (PWE) when welding within 10 ft of pressurized Process Equipment or Wellbay" ? I need to make sure I am working off the most recent version of that document and need to know what the date is of the document that you send me. Second, assuming the above document is the one that is needed in order to meet all requirements for the issuance of a hot work permit, usually on an offshore rig, can you please provide me with instances where it has been used to apply for such permits for hot work that was performed on offshore platforms in the Gulf of Mexico from 1/1/2019 to the present? My understanding is that anybody seeking to perform welding (or any kind of hot work) within 10 feet of pressurized process equipment or wellbay needs to apply for a hot work permit that someone from your office/BSEE/BOEM Gulf of Mexico must sign off on to ensure that all the checklist items have been met. So, for example, the documents I am envisioning that you would be kind enough to send would show (a) what service company supplied the pressurized welding enclosure (otherwise known as a habitat or hot work safety enclosure), the main providers being Safezone Safety

						Systems LLC, Safe Arc Technology, Safehouse Habitats, Hot-Hed Inc., HH Oil Tools, and P3 Global Personnel LLC; (b) the name of the platform on which that enclosure was used; and (c) what hot work permits were issued or denied in relation to the anticipated hot work to be conducted. I greatly appreciate your help in this matter.

DOI-BOEM-2021-006006	09/14/2021	09/27/2021	Cannizzaro, Cynthia	Arena Energy	Closed	I am looking for 2 sets of Seismic data shot by Shell Offshore back in 1988. This data was shot Offshore in the Gulf of Mexico in the Green Canyon area. The industry survey name is Bullwinkle 3D. According to the Bureau of Ocean Energy Management website, Federal regulations require data from exploration activities resulting from private companies operating under BOEM permits be held proprietary for 25 years and then released to the public. The Code of Federal Regulations 30 CFR Parts 551 and 580 allow for the release of G&G data and information upon completion of the proprietary term for said data and information. For processed seismic reflection data that proprietary term is 25 years from the issuance of the G&G permit. Accordingly, data provided to BOEM from 1975 to 1990 are now eligible for public release on the National Archive of Marine Seismic Surveys (NAMSS). Bullwinkle 3D was shot by Shell in 1988 under permit from the Minerals Management Service , which is now the BOEM and has been held for 33 years. This data should have been released to the public 8 years ago, but it has not been released. I am requesting it be released to the public. Thank you.
