

Block	Hectares
6002	1753.124405
6052	1867.243476
6102	1981.332849
6152	2095.392458
6202	2209.422240
6251	25.614057
6252	2297.808073
6301	133.392064

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

Onshore planimetric base compilation is from Alaska Department of Natural Resources, 1:250,000 U.S.C.S. quadrangle maps dated 1950's to 1980's.

The grid distance of the irregular blocks along the zone boundary are defined in the Minerals Management Service Technical Information Management System.

The coordinate values appearing on this document were derived using NAD 83/WGS 84.

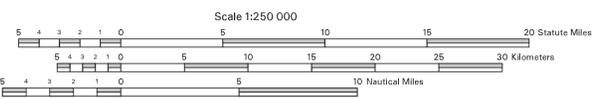

The State Seaward Boundary and Limit of '8(g) Zone' lines depicted hereon reflect the official federal position for Submerged Lands Act and OCS Lands Act purposes. The areas of the fractional blocks abutting these lines have been determined and are as depicted on the Supplemental Official OCS Blocks Diagrams (SOBD's). Consult the SOBD's for official descriptions and approval dates.

Copies of these diagrams and other information may be obtained at the appropriate MMS OCS Region, Office of Program Services.

Legend:
— State Seaward Boundary
— Limit of "8(g) Zone"

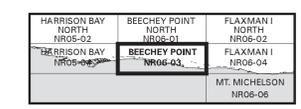

This revised diagram supersedes protraction diagram BEECHY POINT NR06-03, approved 01-FEB-1996.
