GEOLOGICAL OR GEOPHYSICAL DATA RELEASE ANNOUNCEMENT

Outer Continental Shelf (OCS) Permit 75-02 Cook Inlet, Gulf of Alaska, Kodiak, and Shumagin Planning Areas - ALASKA

DATE: May 2026
PERMITTEE: Digicon, Inc.
DATA COLLECTED BY: Digicon, Inc.
TYPE OF DATA: 2D Seismic Survey
ACQUISITION DATES: May 22, 1975, to October 16, 1975
QUANTITY: Approximately 5,728-line miles of multi-channel seismic reflection data on the OCS.

ACQUISITION METHOD: Acquired using an air gun source (1260 cubic inches)

DESCRIPTION OF DATA OR INFORMATION: Selected data received by BOEM under this permit was submitted as high resolution paper seismic lines. These lines have since been scanned and exported as digital image (TIF) files. These datasets contain common depth point (CDP) data comprising approximately 5,728-line miles of seismic scans. The data release contains:

- 150 lines of high resolution stacked (STK) data suitable for digitization and interpretation. BOEM staff used these to create a single composite line (75-02_Line_419_STK_composite) which is also included as part of this release.
- 116 lines of low resolution stacked (STK) data
- 28 files of RMS Velocity scans suitable for digitization and interpretation. Approximately 5475 miles of these scans were received.
- Digital navigation files. The original Digicon navigation file is provided as a 27 file. A modern navigation file in UKOOA P190 format is also provided.
- High- and low-resolution scans of shot point location maps submitted by Digicon
- A shapefile containing name and length in miles for each line in WGS84
- A map showing line location

Under the conditions of the Permit and subsequent regulations, these data acquired by BOEM (formerly MMS or USGS) are now available to the public through the U. S. Geological Survey on the National Archive of Marine Seismic Surveys web site

(<http://walrus.wr.usgs.gov/NAMSS/survey/b-ak-02-75/>).
