GEOLOGICAL OR GEOPHYSICAL DATA RELEASE ANNOUNCEMENT

Outer Continental Shelf (OCS) Permit 81-02
Beaufort Sea Planning Area - ALASKA

DATE: August 2026
PERMITTEE: Geophysical Service Inc.
DATA COLLECTED BY: Geophysical Service Inc.
TYPE OF DATA: 2D Seismic Survey
ACQUISITION DATES: February 20, 1981 to April 26, 1981
QUANTITY: Approximately 643.17 line miles of multi-channel seismic reflection data on the OCS Beaufort Sea Planning Area.
ACQUISITION METHOD: Over ice using vibrators as the energy source.

DESCRIPTION OF DATA OR INFORMATION:

Geophysical Service Inc. acquired 643.17 total line miles of multi-channel seismic reflection data under this permit in the Beaufort Sea Planning Area. MMA (then BOEM) previously released STK and MIG data collected under this permit to NAMSS in April, 2008. This data is available on NAMSS as B-02-81-AR. A subsequent data selection is not available as part of this data release. The data released from this selection contains:

- 22 lines of migrated seismic data with embedded navigation (True Amp Mig Amplitudes).
- A shapefile containing the name and length (in miles) for each released line, referenced to WGS84.
- A map showing line locations for all lines included in the release.

Under the conditions of the Permit and subsequent regulations, these data acquired by MMA are now available to the public through the U. S. Geological Survey on the National Archive of Marine Seismic Surveys web site (<http://walrus.wr.usgs.gov/NAMSS/survey/B-02-81-AK/>).
