GEOLOGICAL OR GEOPHYSICAL DATA RELEASE ANNOUNCEMENT

Outer Continental Shelf (OCS) Permit 84-37
Beaufort Sea Planning Area - ALASKA

DATE: August 2026
PERMITTEE: Western Atlas International
DATA COLLECTED BY: Western Atlas International
TYPE OF DATA: 2D Seismic Survey
ACQUISITION DATES: July 27, 1984 to October 4, 1984
QUANTITY: Approximately 2393 line miles of multi-channel seismic reflection data mostly on the OCS Beaufort Sea Planning Area.
ACQUISITION METHOD: Towed streamer using an air gun array as the sound source.

DESCRIPTION OF DATA OR INFORMATION:

Western Atlas International acquired 2393 total line miles of multi-channel seismic reflection data under this permit in the Beaufort Sea Planning Area. Select processed and reprocessed datasets were selected for permanent retention by MMS (now MMA). The data released from this selection contains:

- 130 lines of migrated, phase rotated, reprocessed seismic data with embedded navigation (True Amp Mig Rot Reproc).
- 86 lines of migrated automatic gain control seismic data with embedded navigation (AGC Mig)
- 2 lines of migrated, phase rotated seismic data with embedded navigation (True Amp Mig Rot).
- A shapefile containing the name and length (in miles) for each released line, referenced to WGS84.
- A map showing line locations for all lines included in the release.

Under the conditions of the Permit and subsequent regulations, these data acquired by MMA are now available to the public through the U. S. Geological Survey on the National Archive of Marine Seismic Surveys web site (<http://walrus.wr.usgs.gov/NAMSS/survey/B-37-84-AK/>).
