Match Line NL01-A

Revolution Wind | Powered by Ørsted & Eversource

Appendix A: Revolution Wind Cumulative Visual Simulations

NL01-B: Nomans Land Island NWR, Chilmark, Massachusetts

Existing Conditions

Environmental Data
Date Simulated*: 12/12/2017
Time Simulated: 8:30 AM
Temperature: NA
Humidity: NA
Visibility: >10 miles
Wind Direction: NA
Wind Speed: NA
Conditions Simulated: Partly Cloudy

Virtual Camera Information
Lens Focal Length: 50 mm
Camera Height: 42.1 feet AMSL

Key Observation Point Information
County: Dukes
Town: Chilmark
State: Massachusetts
Location: Nomans Land Island
Latitude, Longitude: 41.25712° N, 70.83100° W
Direction of View (Center): Southwest (214.6°)
Field of View: 124° x 55°

Visual Resources
Landscape Similarity Zone: Coastal Bluff
User Group: No Access
Aesthetic Resource: Nomans Land Island National Wildlife Refuge

Notes:

- Photosimulation Size: 66" in width by 29.3" in height. Images should be viewed from 15 inches in order to obtain the proper perspective.
- The potential number of WTGs and OSSs screened from view was calculated using a curvature of the earth model based on the distance, viewer height, and maximum structure height. This analysis does not consider the screening effects of intervening vegetation, structures, and topography.
- Offshore Substation location and dimensions are based on preliminary publicly available project data. Projects for which this data is not currently available, WTGs are used for all foundation positions. OSS positions and dimensions considered in this photosimulation are subject to potential modification.
- Nighttime photosimulations are digitally adjusted from daytime photographs. Nighttime photographs captured at each represented KOP inform the presence or lack of existing light sources.
- The existing WTGs associated with the Block Island Wind Farm are 16.9 miles from KOP LI04. In the daytime photosimulation, the WTGs appear faint due to atmospheric perspective commonly occurring on clear days such as the conditions illustrated in this photosimulation. In order to illustrate maximum potential visibility of the proposed WTG, this degree of atmospheric perspective is not applied to the photosimulations.
- Photographs were not obtained from NL01 during field review due to public access restrictions. In place of an actual photograph from this location, EDR created a virtual three-dimensional (3D) model of the island.

Simulation Size: 66" in width by 29.3" in height. Images should be viewed from a distance of 15 inches in order to obtain the proper perspective.

This box should be exactly 1" long on the printed panorama
