

PROGRESS REPORT FOR OCS-A 0539

MAY 1, 2025 TO OCTOBER 31, 2025

Submission Date: 10/31/2025

Version: 1

Prepared Pursuant to Lease Addendum C Section 3

Prepared by: Community Offshore Wind, LLC

Executive Summary

Since the submittal of the previous Progress Report ending April 30, 2025, Community Offshore Wind (COSW) has continued the development of Lease Area Outer Continental Shelf (OCS)-A 0539 in a responsible manner. COSW's current scope of development activities has been reduced due to the ongoing review of offshore wind projects and lease areas. Despite the adjusted scope, COSW is committed to continued outreach with Tribes/Tribal Nations, commercial and recreational fisheries, federal and state agencies, and all other stakeholders, as appropriate for the current and forecasted project development intensity.

A summary of the engagement activities held with Tribes/Tribal Nations or other lessee's Tribal Relations Managers is provided in Section 2. A summary of stakeholder engagement is provided in Section 3, with Fisheries engagement presented in Section 3.1, Agency engagement presented in Section 3.2, and other stakeholder engagement presented in Section 3.3.

For additional information on the Project, please visit our website: https://communityoffshorewind.com/.

OCS outer continental shelf

SCEMFIS Science Center for Marine Fisheries

USEPA United States Environmental Protection Agency

1 Purpose and Background

1.1 Purpose

In accordance with Lease Stipulation 3.1, Community Offshore Wind (COSW) must submit a Progress Report to the Bureau of Ocean Energy Management (BOEM) every six months, starting from the Effective Date on the Lease on through approval of the Construction and Operations Plan (COP). This report covers the seventh six-month period, from May 1, 2025 to October 31, 2025. The purpose of this Progress Report is to document overall project progress and engagement activities undertaken with Tribes/Tribal Nations, communities, ocean user groups, the general public, and other stakeholder groups throughout the reporting period, in addition to COSW's plans for continued engagement.

1.2 Lessee Information

Community Offshore Wind, LLC, a joint venture of RWE and National Grid, proposes to develop the COSW Project (COSW Project, Project), under the BOEM Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf (Lease Area OCS-A 0539; Lease Area).

Additional information about COSW can be found on our website: https://communityoffshorewind.com/.

1.3 Lease Description

Lease Area OCS-A 0539 encompasses approximately 125,964 acres (50,976 hectares) and is located approximately 37 miles (32 nautical miles; 60 kilometers) from the closest point on land in New Jersey and approximately 64 miles (56 nautical miles; 104 kilometers) from the closest point on land in New York. Water depths within the Lease Area range from 98-171 feet (30-52 meters) mean lower low water. The location of Lease Area OCS-A 0539 is shown on Figure 1, below.

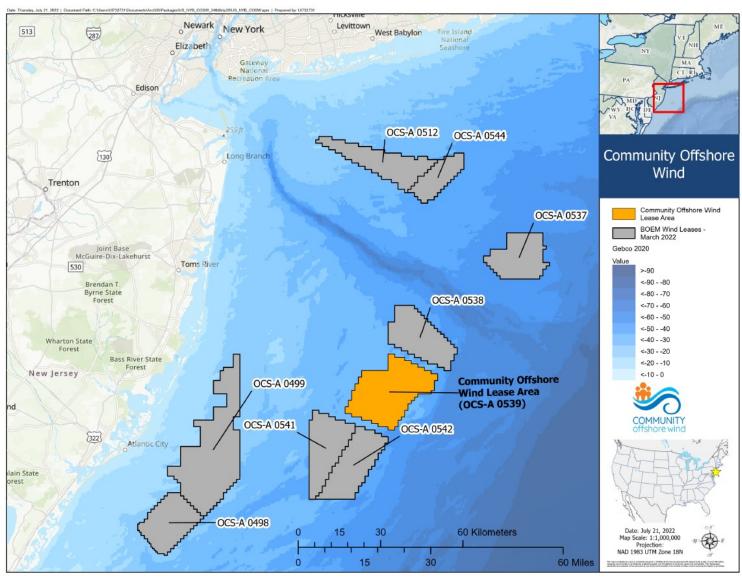

Figure 1 Lease Area OCS-A 0539

2 Tribes/Tribal Nations Engagement

COSW believes it is important to recognize Tribes/Tribal Nations as the original and continuing stewards of the lands and waters in which we work. We acknowledge and respect the enduring historical, cultural, and personal connections between Tribes/Tribal Nations to the region, both those Tribes/Tribal Nations currently residing in the region and those that were removed from it. We believe that the insights and knowledge of Tribes/Tribal Nations can and should play an important role in the clean energy transition, to help ensure that offshore renewable energy is developed in an environmentally, socially, and culturally sustainable manner.

A summary of engagement activities held and anticipated to be held over the next reporting period, with Tribes/Tribal Nations is provided in Section 2.1 through 2.4, below. These sections provide an overview of engagement with potentially affected federally recognized.

2.1 Overall Tribes/Tribal Nations Engagement Progress Since Last Report

Since the submission of the previous Progress Report, COSW has continued to engage with Tribes/Tribal Nation as we plan Project development activities, and adapt to regulatory changes, and policy shifts with respect to offshore wind. Engagement, at a level consistent with ongoing development activities will occur through the next reporting period.

The Joint New York Bight (NYB) Native American Tribal Communication Plan (NATCP) is being updated with the new contacts for lessees and will be placed on all developers' websites based on discussions with the other developers that are part of the Joint NATCP for the NYB.

2.2 Identification of Potential Project Effects Related to Tribes/Tribal Nations Interests

Tribes and Tribal Nations have previously expressed concerns to COSW about the limited time they typically have to review offshore wind project COPs and associated studies during BOEM's National Environmental Policy Act and National Historic Preservation Act reviews. They have repeatedly requested that offshore wind project developers provide them with an opportunity to review and comment on COP supporting study reports and offer feedback well before BOEM initiates its National Environmental Policy Act and National Historic Preservation Act reviews. Tribes and Tribal Nations believe that receiving these documents earlier and holding virtual or face-to-face meetings with Tribal representatives, offshore wind developers, and the developers' technical consultants to discuss study results will help address their capacity issues. Consequently, COSW plans to share COP supporting studies with Tribes and Tribal Nations concurrently when submitting the studies to BOEM.

2.3 Tribes/Tribal Nations Feedback on Export Cable Planning

COSW will reengage with Tribe/Tribal Nations to continue assessment of potential cable routes when appropriate considering the current pace of Project development

2.4 Anticipated or Scheduled Tribes/Tribal Nations Engagement Activities

During the next reporting period, COSW anticipates the following engagement:

 $\bullet \quad \text{COSW will update the contact information for the Joint NATCP with the other developers.}\\$

3 Engagement with Potentially Affected Parties

COSW believes that coordination and engagement with all stakeholders is crucial to the success of an offshore wind project and is committed to a timely and consistent approach, ensuring the Project is developed in an environmentally, socially, and culturally sustainable manner for all. Starting prior to the effective date of Lease OCS-A 0539, COSW began to identify and engage with various types of stakeholders, identified as potentially interested in or affected by offshore wind and the Project. In support of the stakeholder engagement strategy, a list of stakeholders which are potentially applicable to the development, construction, and operations of an offshore wind farm in the NYB was developed and can be found in Appendix A. This list is intended to be a "living" document and will be updated throughout the process, as additional stakeholders are identified.

COSW has continued to reach out to stakeholders to introduce the Project and Project team, to provide an overview of the Project, and to solicit feedback. A summary of the engagement activities held with Commercial and Recreational Fisheries, Maritime, and other marine users is provided in Section 3.1, a summary of Agency engagement presented in Section 3.2, and a summary of other stakeholder engagement presented in Section 3.3.

3.1 Summary of Commercial and Recreational Fisheries, Maritime, and Other Marine Users Engagement Activities

3.1.1 Overall Engagement Progress Since Last Report

Since the submittal of the previous Progress Report, COSW had 57 direct engagements with fishery participants and stakeholders, as well as other maritime users. Engagements during this reporting period focused primarily on maintaining existing relationships with fisheries constituents, regulators, and researchers and new engagement focused on the development of the regional fisheries compensatory mitigation fund through participation on the Design Oversight Committee. The Project team continues to take a broad approach to engagement with a full range of potentially interested parties as detailed in Table 1. Engagement strategies included in-person meetings, text messages, phone and video calls, small group meetings, large group virtual and in-person meetings as well as attendance at technical working groups and industry forums.

COSW's two Fisheries Technical Advisors/Fisheries Representatives continue to play an important role in engaging with and communicating the concerns and perspectives of their respective fisheries to the Project and had an additional 133 direct engagements during the reporting period. The Project team also attended various regional fishery management council and other fisheries-related meetings, both virtually and in-person, to maintain awareness of issues of importance to fisheries participants and stakeholders.

COSW is aware of the engagement burden on fisheries participants and fisheries, maritime, and other marine stakeholders. Exploring efficient and effective communication methods will remain a focus of our conversations throughout the lifetime of the Project.

COSW continued to participate in the American Clean Power (ACP) Fisheries Subcommittee (Fisheries Subcommittee) to coordinate within the industry on important fisheries considerations. COSW participates in the Fisheries Subcommittee's biweekly virtual meetings, which serve as a broader forum for discussion and coordination on fisheries topics relevant to multiple regions. COSW

is also a member of ACP's Maritime Subcommittee, which meets regularly to discuss issues related to navigation, safety, and other maritime uses.

COSW has maintained active participation as the only offshore wind developer to join the membership of the Science Center for Marine Fisheries (SCEMFIS), a National Science Foundation Industry/University Cooperative Research Center. The goal of this collaborative is to provide academic research products that address scientific needs and enhance fisheries management through engagement with industry partners. COSW has sponsored a project to explore the costs, logistical constraints, and policy implications of Atlantic surfclam (*Spisula solidissima*) hatchery and nursery siting, as well as reuse of optical benthic survey data to inform Atlantic surfclam distribution. COSW has continued working with the National Oceanic Atmospheric Administration National Marine Fisheries Service to advance the objectives of their joint Cooperative Research and Development Agreement through regular meetings to identify monitoring priorities and research questions that will support important elements of the National Oceanic Atmospheric Administration National Marine Fisheries Service/BOEM Federal Survey Mitigation Strategy.

A summary of the engagement activities held with commercial and recreational fisheries participants and fisheries, maritime, and other marine stakeholders is provided in Table 1, below. Please note that many engagement activities cover multiple topics and do not have a single focus.

3.1.2 Identification of Potential Project Effects Related to Parties

COSW continues to discuss potential Project effects raised by fisheries participants and fisheries, maritime, and other marine stakeholders during this reporting period:

- **Ecological**: Potential benefits to recreational fisheries and how to monitor changes in the recreational catch rates within the Project area.
- **Safety and Navigation**: The need for appropriate marking and lighting of turbine structures to promote safe navigation within and around lease areas.
- Access and Economics: Interest in potential economic impacts to shoreside processors and
 mechanisms or studies to support mitigation measures for this sector if it is impacted. This
 is being addressed through the multi-state effort to design a regional fisheries compensatory
 mitigation fund. Additional interest in opportunities to provide vessel services from the
 fishing industry to the future Project and related economics.

The Project team continues to integrate fisheries participant and stakeholder feedback into the overall Project development and is actively working to incorporate concerns identified during this and previous reporting periods into Project design and development.

3.1.3 Feedback from Parties on Export Cable Planning

COSW continues to plan final location of the export cable required to connect the Project to the electric grid. The Project team has incorporated local knowledge of important fishing areas and fisheries habitats from engagements with area fishing captains into the export cable planning process. COSW has continued to conduct outreach to subsea cable owners with assets in the offshore export cable planning area during the reporting period and previously engaged port authorities, pilot

associations, and other maritime users in the nearshore export cable planning area to identify concerns and inform development and future construction of export cable routes.

Table 1 Engagement with Commercial and Recreational Fisheries Participants and Stakeholders During Reporting Period^a

Focus of Discussion or Engagement	Party(ies)	Summary of Engagement Activities	Follow-up Actions, Activities, and Outcomes
Updates on Project	All Parties Commercial and Recreational fisheries participants and stakeholders; academic and research institutions and programs; state and federal agencies; resource survey managers; fisheries liaisons and representatives; regional fishery management councils	 Overall updates on Project activities and timelines Ongoing engagement with fisheries participants, managers, and researchers 	Adjusted and streamlined meeting frequencies with stakeholders to reflect current level of activity.
Fisheries use patterns Emerging recreational fisheries within US Projects Project updates and offshore wind development nationally	Recreational Recreational fishermen; tackle or recreational industry; charter/for-hire fishermen; recreational fishing association	 Direct communication and/or discussion of the following: Status of Project activities and potential effects of the January 20, 2025 Presidential Memorandum regarding Wind Projects on Project planning. Informed recreational fisheries stakeholders of Project reorganization and expected level of activity. Discussed emerging recreational fisheries within constructed offshore wind projects. 	 Integrate feedback on fishing activities into Project's understanding of local and regional fisheries. Provided future fisheries point-of-contact information.
Fisheries research and monitoring Economic opportunities for vessel services	Commercial Commercial fishermen; fleet owners/managers; vessel service providers, seafood processors	 Direct communication and discussion of the following: Opportunities for commercial industry participation in future Project collaborative research and monitoring efforts. Status of Project survey, development, and engagement activities and potential effects of the January 20, 2025 Presidential Memorandum regarding Wind Projects on Project planning. Informed commercial fisheries stakeholders of Project reorganization and expected level of activity. Updates on vessel services activities and associated economic opportunities in other US projects. 	 Integrate feedback on safety concerns activities into Project and COP. Integrate roles for industry into ongoing development of monitoring and research programs. Participate in regional initiatives to co-develop research ideas with industry. Continue to support development of Project's vessel assurance process. Provided future fisheries point-of-contact information.

Focus of Discussion or Engagement	Party(ies)	Summary of Engagement Activities	Follow-up Actions, Activities, and Outcomes
Regional monitoring approaches and standards Federal survey mitigation Regional fisheries compensation	State and federal agencies	 Regular calls and other meetings with agency staff to share information and discuss topics including: Continued engagement with the Northeast Fisheries Science Center on the Project's Cooperative Research and Development Agreement. Status of federal fisheries survey mitigation plans, and use of alternative methods and platforms (e.g., eDNA, hook-and-line surveys) for conducting fisheries resources surveys within offshore wind lease areas. Development of standards for project-level fisheries and socioeconomic monitoring, and data/information needs for cumulative impact assessment. Opportunities to incorporate resiliency in the ongoing approach to developing a regional fisheries compensatory mitigation plan. Progress of RFA and Design Oversight Committee on fisheries compensation fund development and engagement. Participation in collaboration efforts supported by states like NYSERDA's F-TWG and M-TWG meetings. Informed fisheries agency stakeholders of Project reorganization and expected level of activity. 	 Integration of feedback into development of Project's fishery resource monitoring and research framework. Continued tracking and feedback on NOAA Fisheries development of monitoring standards. Continued participation in regional fisheries compensation fund development through the ACP Fisheries Subcommittee. Adjustments to cadence of regular call schedules and Project points-of-contact. Continued participation in Design Oversight Committee to support the design of the regional fisheries compensatory mitigation fund.
Existing monitoring approaches, research, and extension initiatives Monitoring plan design, methods, and tools Federal survey mitigation Opportunities for collaboration and partnerships	Academic or research institutions and programs	 Participated in working group and advisory body meetings of regional research collaboratives (RWSC, ROSA). Discussed regional data, research, and governance needs associated with monitoring plans. Participated in regular meetings of SCEMFIS industry/university research cooperative, attended semi-annual IAB meeting. Coordinated with primary investigators and IAB members regarding potential economic studies and will provide support for an upcoming economic study. Informed scientific fisheries stakeholders of Project reorganization and expected level of activity. 	 Integrate feedback into ongoing development of Project's fisheries monitoring plan and future discussions regarding regional coordination of fisheries permitting, monitoring, and survey mitigation. Continued exploration and development of future collaborative opportunities with commercial and recreational fishing industries. Continued support of proposed project for consideration at SCEMFIS annual IAB meeting.
Project update	RFMC	Provided MAFMC staff with an update on the Project and the industry and development of compensatory plans through East Coast and West Coast initiatives.	Continued tracking of NOAA's monitoring and general Project updates as future topics.
Project updates and industry perspectives Navigational safety Vessel assurance Mitigation guidance	Fisheries liaisons; fisheries representatives	 Team calls to discuss Project development and industry perspectives. Discussed fishery conditions within regional gillnet (monkfish, dogfish, skate species) fisheries, and status of scallop resources. Discussed industry interest in offshore wind opportunities, availability of safety training classes, vessel assurance and potential for assistance to meet future certification requirements. Discussed updates on the activities related to the Regional Fund Administrator's outreach to support the design of the regional fisheries compensatory mitigation fund Discussed Project reorganization, points-of-contact, and expected levels of engagement. 	 Continue to support Project's vessel assurance process and integrate feedback on required certifications and training into program development. Continue to identify future economic opportunities for vessels services from the fishing industry for the Project.

Focus of Discussion or Engagement	Party(ies)	Summary of Engagement Activities	Follow-up Actions, Activities, and Outcomes
Project design and cable routing	Marine commercial operators; subsea cable asset owners	Outreach to cable asset owners to discussplanned subsea cable activities planned within the Project area to discuss deconfliction and coordination.	 Integrate feedback into Project and COP development. Provided updates regarding survey activities and anticipated Project development timelines.

Notes:

BOEM = Bureau of Ocean Energy Management; COP = Construction and Operations Plan; COSW = Community Offshore Wind; eDNA = environmental deoxyribonucleic acid; IAB = Industry Advisory Board; F-TWG = Fisheries Technical Working Group; MAFMC = Mid-Atlantic Fishery Management Council; M-TWG = Maritime Technical Working Group; NOAA = National Oceanic Atmospheric Administration; NOAA Fisheries = National Oceanic Atmospheric Administration National Marine Fisheries Service; NYSERDA = New York State Energy Research and Development Authority; Project = COSW Project, Community Offshore Wind Project; RFA = Regional Fund Administrator; RFMC = Regional Fishery Management Council; ROSA = Responsible Offshore Science Collaborative; SCEMFIS = Science Center for Marine Fisheries; US = United States

^a The engagement activities listed within this table are from November 1, 2024 to April 30, 2025. The next Progress Report will include engagement activities from May 1, 2025 through October 31, 2025.

3.1.4 <u>Anticipated or Scheduled Engagement Activities</u>

COSW is committed to maintaining engagement with all interested and affected fisheries stakeholders, even while the pace of Project development has changed. During the next reporting period, COSW anticipates the following engagement:

- COSW will continue outreach and coordination with fisheries stakeholders, fishery managers, subsea asset owners, maritime industry operators, and the United States Coast Guard, as the Project continues to maintain its stakeholder relationships in advance of future Project development.
- COSW will continue to support the development of a comprehensive regional fisheries compensatory mitigation fund through its participation in the ACP Fisheries Subcommittee and the Regional Fund Administrator Design Oversight Committee.
- COSW will continue to participate in ACP's Fisheries Subcommittee and work groups and will continue informal coordination with other NYB developers to promote efficient regional engagement approaches where appropriate.
- COSW will continue to develop its monitoring and research framework in collaboration with federal fisheries agency partners, which includes exploration of coordinated regional monitoring and federal survey mitigation approaches with other lessees and development of opportunities for interested fisheries participants.
- COSW will continue to engage with representatives of the commercial and recreational fishing industries to improve coordination and communication.

3.2 Summary of Agency Engagement Activities

3.2.1 Overall Engagement Progress Since Last Report

Since the submittal of the previous Progress Report, COSW held one inter-agency meeting, which provided an opportunity for agencies to hear from the Project team, receive an update on the Project, share important information, and provide feedback and recommendations. Due to the current scale and pace of Project development, this meeting was intended to supplement regular engagement with individual agencies. COSW regularly engaged with BOEM, meeting on an as-needed basis.

A summary of the engagement activities held with agencies is provided in Table 2, below.

Table 2 Engagement with Agencies During Reporting Period

Focus of Discussion or Engagement	Party(ies)	Summary of Engagement Activities	Follow-up Actions, Activities, and Outcomes
Regular Meetings held with BOEM	воем	Regularly scheduled meetings were held with BOEM to discuss the development of the Lease Area and relevant Lease Stipulations. Specifically, COSW discussed the status of the anticipated Project timeline, impacts of the January 20, 2025 Presidential Memorandum regarding Wind Projects on the offshore wind industry and other recent Secretarial Orders, among other items.	COSW to continue providing BOEM with regular Project updates.
Interagency Project Meeting	BOEM, NOAA, NPS, USACE, USCG, USEPA, USFWS, NJDEP, NYSDEC, NYSDOS, NYSDOT, NYSDPS, NYSOPRHP	COSW shared an update on the Project and sought feedback from attendees. The meeting was held virtually on June 23, 2025. COSW communicated that if there are no changes to Project development an email update may be distributed instead of hosting a meeting.	COSW to determine if an interagency meeting is warranted for December

Notes:

BOEM = Bureau of Ocean Energy Management; COSW = Community Offshore Wind; NOAA = National Oceanic Atmospheric Administration; NJDEP = New Jersey Department of Environmental Protection; NPS = National Park Service; NYSDEC = New York State Department of Environmental Conservation; NYSDOS = New York State Department of State; NYSDOT = New York State Department of Public Service; NYOPRHP= New York State Office of Parks, Recreation, and Historic Preservation; Project = COSW Project, Community Offshore Wind Project; USACE = United States Army Corps of Engineers; USCG = United States Environmental Protection Agency; USFWS = United States Fish and Wildlife Service

3.2.2 <u>Identification of Potential Project Effects Related to Parties</u>

One potential effect related to the Project or Project activities was raised by the United States Environmental Protection Agency (USEPA) for COSW consideration during this reporting period. The USEPA noted that if the Project is required to get an Air Permit from USEPA, there is a United States Fish and Wildlife Service Class I Wilderness at E.B Forsythe National Wildlife Refuge. It is located on the New Jersey coast North of Atlantic City and will require additional analysis as part of the air permit.

3.2.3 Anticipated or Scheduled Engagement Activities

During the next reporting period, COSW anticipates the following engagement:

- COSW will continue to meet with BOEM to provide Project updates.
- COSW will host a regular bi-annual inter-agency meeting in December 2025/January 2026 if new or substantive information regarding Project development is available. Alternatively, COSW will notify agencies via email that there are no updates.
- COSW will continue engagement with the agencies to discuss protocols and methodologies for resource assessments to be developed in support of the COP, as dictated by Project development activities.

3.3 Summary of Other Stakeholder Engagement Activities

As noted in Lease Stipulation 3.1.1, COSW also engaged with other stakeholder parties that may be potentially affected by Project activities on the OCS, which include, but are not limited to, the following:

- Coastal communities:
- Educational and research institutions;
- Environmental and public interest non-governmental organizations;
- Ocean users:
- Submarine cable operators; and,
- Underserved communities.

3.3.1 Overall Engagement Progress Since Last Report

COSW has continued outreach to a variety of stakeholders across our Project geography. Engagement strategies included phone and video calls, attendance at events, and trade shows. The Project team continues to take a broad approach to engagement with stakeholders in order to meet them where they are, leveraging opportunities for sponsorship and participation in local workforce and labor, environmental, educational, community, business and industry, and volunteerism events, based on current development activities.

A summary of the engagement activities held with stakeholders is provided in Table 3, below. The primary focus of most meetings is to introduce COSW and provide regular updates on our progress.

3.3.2 <u>Identification of Potential Project Effects Related to Parties</u>

COSW has identified several categories of potential Project effects raised by stakeholders:

- **Ecological:** Potential effects of cable electromagnetic field; effects of survey equipment and construction on marine wildlife.
- **Workforce:** Raised the need for wraparound services to support workforce development and access to job and contract opportunities, including for the justice-involved and formerly incarcerated.
- **Traffic:** Concerns regarding the impacts on traffic during onshore construction associated with offshore wind projects.

 Table 3
 Engagement with Other Parties During Reporting Period

Focus of Discussion or Engagement	Date(s)	Party(ies)	Role/Summary of Engagement Activities	Follow-up Actions, Activities, and Outcomes
NYCEDC Offshore Wind & Maritime Career and Awareness Fair	5/9/2025	NYCEDC	Sponsor, tabling, engaged attendees	Continuing engagement with host organization and interested attendees

Notes:

ACE NY = Alliance for Clean Energy New York; AMSEAS = Atlantic Marine Conservation Society; IBEW = International Brotherhood of Electrical Workers; IUPAT DC = International Union of Painters and Allied Trades, District Council; LIA = Long Island Association; NY = New York; NYC = New York City; NYCEDC = New York City Economic Development Corporation; NYLCV = NY League Conservation Voters; NYS = New York State; NYSERDA = New York State Energy Research and Development Authority;

3.3.3 Anticipated or Scheduled Engagement Activities

During the next reporting period, COSW anticipates the following engagement:

- COSW will perform outreach to stakeholder groups, included but not limited to federal, state, and local government stakeholders, labor unions, community, and environmental groups as needed.
- COSW will maintain relationships within the communities our Project may affect.

4 Survey Plan(s) Activities

No survey activities occurred since the submittal of the last Progress Report and no survey activities will occur in 2025.
