Interior Department Sets Offshore Energy Leasing Schedule Under One Big Beautiful Bill Act 08/19/2025

WASHINGTON — The Department of the Interior is rolling out a long-term schedule for offshore oil and gas lease sales in the Gulf of America and Alaska's Cook Inlet, as directed by the One Big Beautiful Bill Act (H.R. 1). By committing to a predictable sale schedule, the Department is delivering on President Trump's promise to expand American energy production and strengthen U.S. energy independence.

"The One Big Beautiful Bill Act is a landmark step toward unleashing America's energy potential," said Interior Secretary Doug Burgum. "Under President Trump's leadership, we're putting in place a bold, long-term program that strengthens American Energy Dominance, creates goodpaying jobs and ensures we continue to responsibly develop our offshore resources."

The inclusion of at least 30 lease sales in the Gulf of America underscores the region's indispensable role in America's energy ecosystem, accounting for roughly 14–15% of U.S. crude oil production and serving as the linchpin of offshore energy output. These scheduled sales offer the oil and gas sector much-needed clarity and stability, encouraging continued investment in deepwater infrastructure, which is foundational to national energy resilience. The Gulf supports hundreds of thousands of jobs, contributes tens of billions to GDP annually and generates substantial federal and state revenues. The economic and energy-security gains from these sales are both immediate and long-lasting.
