Anchorage, Alaska, 30 calendar days from the date of the Federal Register notice publication. The surveys, which were executed at the request of the Bureau of Indian Affairs and the BLM, are necessary for the management of these lands.

DATES: The BLM must receive protests by September 30, 2021.

ADDRESSES: You may buy a copy of the plats from the BLM Alaska Public Information Center, 222 W. 7th Avenue, Mailstop 13, Anchorage, AK 99513. Please use this address when filing written protests. You may also view the plats at the BLM Alaska Public Information Center, Fitzgerald Federal Building, 222 West 7th Avenue, Anchorage, Alaska, at no cost.

FOR FURTHER INFORMATION CONTACT: Thomas B. O’Toole, Chief, Branch of Cadastral Survey, Alaska State Office, Bureau of Land Management, 222 West 7th Avenue, Anchorage, AK 99513; 907–271–4231; totoole@blm.gov. People who use a telecommunications device for the deaf may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the BLM during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

The lands surveyed are:

**Copper River Meridian, Alaska**

- U.S. Survey No. 13416, accepted January 13, 2021, situated in T. 17 N., R. 12 E.
- U.S. Survey No. 13941, accepted November 9, 2020, situated in T. 16 N., R. 12 E., and T. 16 N., R. 13 E.
- U.S. Survey No. 14503, accepted January 14, 2021, situated in T. 20 N., R. 11 E.

**Fairbanks Meridian, Alaska**

- T. 3 S., R. 12 W., accepted February 16, 2021.
- U.S. Survey No. 14506, accepted January 15, 2021, situated in T. 13 S., R. 10 E.
- U.S. Survey No. 14507, accepted January 13, 2021, situated in T. 28 S., R. 9 E.
- U.S. Survey No. 14511, accepted January 13, 2021, situated in T. 21 S., R. 7 E.

**Seward Meridian, Alaska**

- U.S. Survey No. 11746, accepted January 27, 2021, situated in T. 16 S., R. 63 W.
- U.S. Survey No. 14465, accepted April 30, 2019, situated in T. 8 S., R. 31 W.

A person or party who wishes to protest one or more plats of survey identified above must file a written notice of protest with the State Director for the BLM in Alaska. The protest may be filed by mailing to BLM State Director, Alaska State Office, Bureau of Land Management, 222 West 7th Avenue, Anchorage, AK 99513 or by delivering it in person to BLM Alaska Public Information Center, Fitzgerald Federal Building, 222 West 7th Avenue, Anchorage, Alaska. The notice of protest must identify the plat(s) of survey that the person or party wishes to protest. You must file the notice of protest before the scheduled date of official filing for the plat(s) of survey being protested. The BLM will not consider any notice of protest filed after the scheduled date of official filing. A notice of protest is considered filed on the date it is received by the State Director for the BLM in Alaska during regular business hours; if received after regular business hours, a notice of protest will be considered filed the next business day. A written statement of reasons in support of a protest, if not filed with the notice of protest, must be filed with the State Director for the BLM in Alaska within 30 calendar days after the notice of protest is filed.

If a notice of protest against a plat of survey is received prior to the scheduled date of official filing, the official filing of the plat of survey identified in the notice of protest will be stayed pending consideration of the protest. A plat of survey will not be officially filed until the dismissal or resolution of all protests of the plat.

Before including your address, phone number, email address, or other personally identifiable information in a notice of protest or statement of reasons, you should be aware that the documents you submit, including your personally identifiable information, may be made publicly available in their entirety at any time. While you can ask the BLM to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

[Authority: 43 U.S.C. Chap. 3.]

Thomas O’Toole,
Chief Cadastral Surveyor, Alaska.

Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Sunrise Wind Farm Project on the Northeast Atlantic Outer Continental Shelf

**AGENCY:** Bureau of Ocean Energy Management (BOEM), Interior.

**ACTION:** Notice of intent (NOI) to prepare an environmental impact statement (EIS); request for comments.

**SUMMARY:** Consistent with the regulations implementing the National Environmental Policy Act (NEPA), BOEM announces its intent to prepare an EIS for the review of a construction and operations plan (COP) submitted by Sunrise Wind LLC (Sunrise Wind) for the construction, and operation of a wind energy facility offshore Massachusetts, Rhode Island, and New York with a proposed interconnection location at the existing Holbrook Substation. BOEM seeks public comment for the EIS scoping process as well as comment concerning compliance with section 106 of the National Historic Preservation Act (NHPA) and its implementing regulations. Detailed information about the proposed wind energy facility, including the COP, can be found on BOEM’s website at: www.boem.gov/Sunrise-Wind.

**DATES:** Comments are due to BOEM no later than September 30, 2021.

BOEM will hold virtual public scoping meetings for the Sunrise Wind EIS at the following dates and times (eastern daylight time):

- Thursday, September 16, 5:30 p.m.;
- Monday, September 20, 1:00 p.m.; and
- Wednesday, September 22, 5:30 p.m.

Registration for the virtual public meetings may be completed here: https://www.boem.gov/Sunrise-Wind-Scoping-Virtual-Meetings or by calling (703) 787–1073.

**ADDRESSES:** Comments can be submitted in any of the following ways:

- In written form, delivered by mail or delivery service, enclosed in an envelope labeled, “SUNRISE WIND COP EIS” and addressed to Program Manager, Office of Renewable Energy, Bureau of Ocean Energy Management, 45600 Woodland Road, Sterling, Virginia 20166; or
- Through the regulations.gov web portal: Navigate to http://
Purpose of and Need for the Proposed Action

In Executive Order 14008, President Biden stated that it is the policy of the United States:

- to organize and deploy the full capacity of its agencies to combat the climate crisis to implement a Government-wide approach that reduces climate pollution in every sector of the economy; increases resilience to the impacts of climate change; protects public health; conserves our lands, waters, and biodiversity; delivers environmental justice; and spurs well-paying union jobs and economic growth, especially through innovation, commercialization, and deployment of clean energy technologies and infrastructure.

Sunrise Wind has the exclusive right to submit a COP for activities located offshore Massachusetts, Rhode Island, and New York in the area covered by BOEM Renewable Energy Lease OCS–A 0487 (Lease Area). A portion of the area covered by Renewable Energy Lease OCS–A 0500 and the entirety of the area covered by Renewable Energy Lease OCS–A 0487 were merged and included in a revised Lease OCS–A 0487 issued to Sunrise Wind on March 15, 2021. Sunrise Wind has submitted a COP to BOEM proposing the construction and installation, operations and maintenance, and conceptual decommissioning of an offshore wind energy facility in the Lease Area (Project).

Sunrise Wind’s purpose and need is to develop a commercial-scale, offshore wind energy facility in the Lease Area, with up to 122 wind turbine generators, an offshore converter station (OCS–DC), inter-array cables, an onshore converter station (OnCS–DC), an offshore transmission cable making landfall on Long Island, New York, and an onshore interconnection cable to the Long Island Power Authority Holbrook Substation. The Project will generate between 880 megawatts (MW) and 1,300 MW of renewable energy. This Project will help the State of New York achieve the aggressive clean energy goals set forth in the Clean Energy Standards Order and the Climate Leadership and Community Protection Act through a power purchase agreement (PPA) contract with the New York State Energy Research and Development Authority to deliver 880 MW of offshore wind energy. Sunrise Wind may modify its PPA contract with NYSERDA to deliver up to 924 MW of offshore wind energy.

Based on the goals of the applicant and BOEM’s authority, the purpose of BOEM’s action is to respond to Sunrise Wind’s COP proposal and determine whether to approve, approve with modifications, or disapprove Sunrise Wind’s COP to construct and install, operate and maintain, and decommission a commercial-scale offshore wind energy facility within the Lease Area (the Proposed Action). BOEM’s action is needed to further the United States’ policy to make Outer Continental Shelf energy resources available for expeditious and orderly development, subject to environmental safeguards (43 U.S.C. 1332(3)), including consideration of natural resources, safety of navigation, and other ocean uses.

In addition, the National Oceanic and Atmospheric Administration (NOAA) National Marine Fisheries Service (NMFS) anticipates receipt of one or more requests for authorization to take marine mammals incidental to activities related to the Project under the Marine Mammal Protection Act (MMPA). NMFS’ issuance of an MMPA incidental take authorization is a major Federal action, and, in relation to BOEM’s action, is considered a connected action (40 CFR 1501.9(e)(1)). The purpose of the NMFS action—which is a direct outcome of Sunrise Wind’s request for authorization to take marine mammals incidental to specified activities associated with the Project (e.g., pile driving)—is to evaluate Sunrise Wind’s request pursuant to specific requirements of the MMPA and its implementing regulations administered by NMFS, considering impacts of Sunrise Wind’s activities on relevant resources, and, if appropriate, issue the authorization. NMFS needs to render a decision regarding the request for authorization due to NMFS’ responsibilities under the MMPA (16 U.S.C. 1371(a)(5)(D)) and its implementing regulations. If, after independent review, NMFS makes the findings necessary to issue the requested authorization, NMFS intends to adopt BOEM’s environmental impact statement (EIS) to support that decision and fulfill its National Environmental Policy Act (NEPA) requirements. The U.S. Army Corps of Engineers (USACE) New York District anticipates a permit action to be undertaken through authority delegated to the District Engineer by 33 CFR 325.8, under section 10 of the Rivers and Harbors Act of 1899 (RHA) (33 U.S.C. 403) and section 404 of the Clean Water Act (CWA) (33 U.S.C. 1344). In addition, it is anticipated that a section 408 permission will be required pursuant to Section 14 of the RHA of 1899 (33 U.S.C. 408) for any proposed alterations that have the potential to alter, occupy or use any USACE federally authorized Civil Works projects. The USACE considers issuance of a permit under these three delegated authorities a major Federal action connected to BOEM’s Proposed Action (40 CFR 1501.9(e)(1)). Sunrise Wind’s stated purpose and need for the project, as indicated above, is to provide a commercially viable offshore wind energy project within the Lease Area to help New York achieve its renewable energy goals. The basic project purpose, as determined by USACE for section 404(b)(1) guidelines evaluation, is offshore wind energy generation. The overall project purpose for section 404(b)(1) guidelines evaluation, as determined by USACE, is the construction and operation of a commercial-scale offshore wind energy project for renewable energy generation and distribution to the New York energy grid. The purpose of USACE section 408 action as determined by EC 1165–2–220 is to evaluate the applicant’s request and determine whether the proposed alterations are injurious to the public interest or impair the usefulness of the USACE project. USACE section 408 permission is needed to ensure that Congressionally authorized projects continue to provide their intended benefits to the public. USACE intends to adopt BOEM’s EIS to support its decision on any permits/permissions requested under section 10 of the RHA, or section 404 of the CWA, and section 408 of the RHA. The USACE would adopt the EIS per 40 CFR 1506.3 if, after its independent review of the document, it concludes that the EIS satisfies the USACE’s comments and recommendations. Based on its participation as a cooperating agency and its consideration of the final EIS, the USACE would issue a Record of Decision to formally document its decision on the proposed action.

Preliminary Proposed Action and Alternatives

As noted above, Sunrise Wind is proposing to construct and operate up to 122 wind turbine generators, an OCS–DC, inter-array cables, an OnCS–DC, an offshore transmission cable making landfall on Long Island, New York, and an onshore interconnection cable to the
Long Island Power Authority Holbrook Substation. The wind turbine generator foundations may be monopiles or gravity base structures with associated support and access structures, in some combination or entirely of one kind. The wind turbine generators, offshore substations, foundations, and inter-array cables would be located within the Lease Area in federal waters approximately 18.9 statute miles (mi) (16.4 nautical miles [nm], 30.4 kilometers [km]) south of Martha’s Vineyard, Massachusetts; approximately 30.5 mi (26.5 nm, 48.1 km) east of Montauk, New York, and approximately 16.7 mi (14.5 nm, 26.8 km) from Block Island, Rhode Island. The offshore export cables would be buried below the seabed in federal and New York State waters. If any reasonable alternatives are identified during the scoping period, BOEM will evaluate those alternatives in the draft EIS, which will also include a no action alternative. Under the no action alternative, BOEM would disapprove the COP and the proposed wind energy facility would not be built.

Once BOEM completes the EIS and associated consultations, BOEM will decide whether to approve, approve with modification, or disapprove the Sunrise Wind COP. If BOEM approves the COP, Sunrise Wind must comply with all conditions of its approval.

Summary of Potential Impacts

The draft EIS will identify and describe the potential effects of the Proposed Action on the human environment that are reasonably foreseeable and have a reasonably close causal relationship to the Proposed Action. This includes such effects that occur at the same time and place as the Proposed Action or alternatives and effects that are later in time or occur in a different place. Potential impacts include, but are not limited to, impacts (whether beneficial or adverse) on air quality, water quality, bats, benthic habitat, essential fish habitat, invertebrates, finfish, birds, marine mammals, terrestrial and coastal habitats and fauna, sea turtles, wetlands and other waters of the United States, commercial fisheries and for-hire recreational fishing, cultural resources, demographics, employment, economics, environmental justice, land use and coastal infrastructure, navigation and vessel traffic, other marine uses, recreation and tourism, and visual resources. These potential impacts will be analyzed in the draft and final EIS. Based on an evaluation of these resources, BOEM expects potential impacts on sea turtles and marine mammals from underwater noise caused by construction and from collision risks with Project-related vessel traffic.

Structures installed by the Project could permanently change benthic habitat and other fish habitat (e.g., creation of artificial reefs). Commercial fisheries and for-hire recreational fishing could be impacted. Project structures above the water could affect the visual character defining historic properties and have visual impacts on recreational and tourism areas. Project structures also would pose an allision and height hazard to vessels passing close by, and vessels would in turn pose a hazard to the structures. Additionally, the Project could cause conflicts with military activities, air traffic, land-based radar services, cables and pipelines, and scientific surveys. Beneficial impacts are also expected by facilitating achievement of State renewable energy goals, increasing job opportunities, improving air quality, and reducing carbon emissions. Specifically, for increasing job opportunities, an 880 MW Sunrise Wind project is estimated to support more than 2,500 job-years during the development and construction phases of the project. During the operations and maintenance phase an 880 MW Sunrise offshore wind project will support about 270 jobs per year during its 35-year operational phase. If Sunrise Wind increases the MW installed, the number of jobs supported will be greater than the estimates cited for the 880 MW project. The EIS will analyze measures that would avoid, minimize, or mitigate environmental effects.

Anticipated Permits and Authorizations

In addition to the requested COP approval, various other Federal, State, and local authorizations will be required for the Project. Applicable Federal laws include the Endangered Species Act, Magnuson-Stevens Fishery Conservation and Management Act, NEPA, MMPA, RHA, CWA, and the Coastal Zone Management Act. BOEM will also conduct government-to-government Tribal consultations. For a detailed listing of regulatory requirements applicable to the Project, please see the COP, volume 1, available at https://www.boem.gov/Sunrise-Wind.

BOEM has chosen to use the NEPA substitution process to fulfill its obligations under NHPA. While BOEM’s obligations under NHPA and NEPA are independent, regulations implementing section 106 of the NHPA, at 36 CFR 800.8(c), allow the NEPA process and NEPA substitution process to fully meet all NHPA obligations.

Schedule for the Decision-Making Process

After the draft EIS is completed, BOEM will publish a notice of availability (NOA) and request public comments on the draft EIS. BOEM currently expects to issue the NOA in October 2022. After the public comment period ends, BOEM will review and respond to comments received and will develop the final EIS. BOEM currently expects to make the final EIS available to the public in July 2023. A record of decision (ROD) will be completed no sooner than 30 days after the final EIS is released, in accordance with 40 CFR 1506.11.

This project is a “covered project” under section 41 of the Fixing America’s Surface Transportation Act (FAST–41). FAST–41 provides increased transparency and predictability by requiring Federal agencies to publish comprehensive permitting timetables for all covered projects. FAST–41 also provides procedures for modifying permitting timetables to address the unpredictability inherent in the environmental review and permitting process for significant infrastructure projects. To view the FAST–41 Permitting Dashboard for the Project, visit: https://cms.permits.performance.gov/permitting-project/sunrise-wind-farm.

Scoping Process

This NOI commences the public scoping process to identify issues and potential alternatives for consideration in the Sunrise Wind EIS. BOEM will hold virtual public scoping meetings at the times and dates described above. Throughout the scoping process, Federal agencies, state, tribal, and local governments, and the general public have the opportunity to help BOEM identify significant resources and issues, impact-producing factors, reasonable alternatives (e.g., size, geographic, seasonal, or other restrictions on construction and siting of facilities and activities), and potential mitigation measures to be analyzed in the EIS, as well as to provide additional information.

As noted above, BOEM will use the NEPA substitution process provided for in the NHPA regulations. BOEM will
consider all written requests from individuals or organizations to participate as consulting parties under NHPA and, as discussed below, will determine who among those parties will be a consulting party in accordance with NHPA regulations.

**NEPA Cooperating Agencies:** BOEM invites other Federal agencies and state, tribal, and local governments to consider becoming cooperating agencies in the preparation of this EIS. The NEPA regulations specify that qualified agencies and governments are those with “jurisdiction by law or special expertise.” Potential cooperating agencies should consider their authority and capacity to assume the responsibilities of a cooperating agency and should be aware that an agency’s role in the environmental analysis neither enlarges nor diminishes the final decision-making authority of any other agency involved in the NEPA process.

Upon request, BOEM will provide potential cooperating agencies with a written summary of expectations for cooperating agencies, including schedules, milestones, responsibilities, scope and detail of cooperating agencies’ contributions, and availability of pre-decisional information. BOEM anticipates this summary will form the basis for a memorandum of agreement between BOEM and any non-Department of the Interior cooperating agency. Agencies also should consider the factors for determining cooperating agency status in the Council on Environmental Quality memorandum entitled, “Cooperating Agencies in Implementing the Procedural Requirements of the National Environmental Policy Act,” dated January 30, 2002. This document is available on the internet at: [energy.gov/sites/prod/files/nepapub/ nepa_documents/RedDon/G-CEQ-CoopAgenciesImplem.pdf](http://energy.gov/sites/prod/files/nepapub/ nepa_documents/RedDon/G-CEQ-CoopAgenciesImplem.pdf).

BOEM, as the lead agency, does not provide financial assistance to cooperating agencies. Governmental entities that are not cooperating agencies will have opportunities to provide information and comments to BOEM during the public input stages of the NEPA process.

**NHPA Consulting Parties:** Certain individuals and organizations with a demonstrated interest in the Project can request to participate as NHPA consulting parties under 36 CFR 800.2(c)(5) based on their legal or economic stake in historic properties affected by the Project. Interested parties are referred to section 106 of the National Historic Preservation Act (NHPA) to determine who among those parties will be referred to that provision to learn about historic resources if it determines that disclosure may, among other things, cause a significant invasion of privacy, risk harm to the historic resources, or impede the use of a traditional religious site by practitioners. Tribal entities and other public or private information on historic resources should designate information that they wish to be held as confidential and provide the reasons why BOEM should do so.

All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

**Request for Identification of Potential Alternatives, Information, and Analyses Relevant to the Proposed Action**

BOEM requests data, comments, views, information, analysis, alternatives, or suggestions from the public; affected Federal, state, tribal, and local governments, agencies, and offices; the scientific community; industry; or any other interested party on the Proposed Action. Specifically, BOEM requests information on the following topics:

1. Potential effects that the Proposed Action could have on biological resources, including bats, birds, coastal fauna, finfish, invertebrates, essential fish habitat, marine mammals, and sea turtles.

2. Potential effects that the Proposed Action could have on physical resources, including air quality, water quality, and wetlands and other waters of the United States.

3. Potential effects that the Proposed Action could have on socioeconomic and cultural resources, including commercial fisheries and for-hire recreational fishing, demographics, employment, economics, environmental justice, land use and coastal infrastructure, navigation and vessel traffic, other uses (marine minerals, military use, aviation), recreation and tourism, and scenic and visual resources.

4. Other possible reasonable alternatives to the Proposed Action that BOEM should consider, including additional or alternative avoidance, minimization, and mitigation measures.

5. As part of its compliance with NHPA section 106 and its implementing regulations (36 CFR part 800), BOEM seeks comment and input from the public and consulting parties regarding the identification of historic properties within the Proposed Action’s area of potential effects, the potential effects on those historic properties from the activities proposed in the COP, and any information that supports identification of historic properties under NHPA.

BOEM also solicits proposed measures to avoid, minimize, or mitigate any adverse effects on historic properties. BOEM will present available information regarding known historic resources.
properties during the public scoping period at https://www.boem.gov/Sunrise-Wind/. BOEM’s effects analysis for historic properties will be available for public and consulting party comment in the draft EIS.

6. Information on other current or planned activities in, or in the vicinity of, the Proposed Action and their possible impacts on the Project or the Project’s impacts on those activities.

7. Other information relevant to the Proposed Action and its impacts on the human environment.

To promote informed decision-making, comments should be as specific as possible and should provide as much detail as necessary to meaningfully and fully inform BOEM of the commenter’s position. Comments should explain why the issues raised are important to the consideration of potential environmental impacts and alternatives to the Proposed Action as well as economic, employment, and other impacts affecting the quality of the human environment.

The draft EIS will include a summary of all alternatives, information, and analyses submitted during the scoping process for consideration by BOEM and the cooperating agencies.

Authority: This NOI is published in accordance with NEPA, 42 U.S.C. 4321 et seq., and 40 CFR 1501.9.

William Yancey Brown, Chief Environmental Officer, Bureau of Ocean Energy Management.

DEPARTMENT OF LABOR

Employee Benefits Security Administration

208th Meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans; Notice of Teleconference Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, the 208th open meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans (also known as the ERISA Advisory Council) will be held via a teleconference on Thursday, September 30, 2021.
