

ABOUT OW EAST

OW East, LLC (OW East), a partnership between Ocean Winds (OW), an international offshore wind energy company created by EDP Renewables (EDPR) and ENGIE (50:50), and New York-based Global Infrastructure Partners, was awarded an offshore lease area (OCS-A 0537) in February 2022 by the U.S. Bureau of Ocean Energy Management in the New York Bight area. The lease area covers 71,522 acres and is located 38 nautical miles (nm) off the coast of New York and 53 nm off the coast of New Jersey.

COMMITMENT TO SUSTAINABILITY

OW is strongly committed to sustainability and the protection of our natural resources and preservation of historic resources across all projects. OW supports the advancement of science and the scientific study of our ocean resources and its complex ecosystems. OW East will seek the perspectives and input from all communities and stakeholders with environmental, cultural, economic, maritime and historical ties to the lease area to advance our understanding and find mutually beneficial solutions.

PRINCIPLES OF ENGAGEMENT

- » We are committed to developing **long-term partnerships and relationships** that lead to equitable benefits for future generations.
- » We seek to establish **trust and accountability** with our stakeholders through **transparent and collaborative** communications and processes during all project development stages.
- » We **listen actively** to hear the people in front of us and tailor solutions to local needs, knowing the most **innovative ideas** often come from individual lived experiences.
