RE: Modification of Geological and Geophysical (G&G) Permit 14-01

Dear Ms. Simonds:

On March 31, 2014, SAExploration submitted a request to BOEM for approval to modify ongoing geophysical exploration operations on Outer Continental Shelf (OCS) lands in the Beaufort Sea under G&G Permit 14-01, a permit under regulation 30 CFR 551.8(b). The modification will move the western boundary of the permitted area 10 miles to the west.

BOEM has determined that the modification does not result in a significant change to the permit and no additional NEPA review is necessary. The modification is approved. A detailed track map of planned operations must be submitted to this office prior to the start of seismic operations in the new area.

Sincerely,

Rance R. Wall
Regional Supervisor
Resource Evaluation
